

PHOTO OF JESUS

Walter Last

In the early 1990's I visited Maurice Finkel, the editor of Australasian Health and Healing (no longer in print). He demonstrated to me with his pendulum the extraordinary radiation across the room from a photo that he had just published in his journal. He had received the photo from tourists who had taken pictures in Israel. On one of these photos were several figures that were not seen when it was taken. It was obviously a scene at the shores of Lake Galilee (also called the Sea of Galilee) where Jesus used to teach.

From the New Testament it is obvious to me that this scene shows Jesus talking to Nicodemus as in John 3:1-21. I believe that the third figure was James the Just, the younger brother of Jesus. The present digital photo still appears to radiate the same powerful energy as the original analogue photo.

I see a close resemblance of the Jesus figure in this photo with the only other supposedly genuine portrait of Jesus in this engraved amulet:

The Unique and Authentic Image of the Master Jesus

From:

www.gnosticteachings.org/content/category/5/108/114

Taken from an emerald cutting said to be engraved by order of the Roman Emperor Tiberius. It comes from the Treasure of Constantinople and was surrendered by the Sultan of Turkey to Pope Innocent VIII as ransom payment for his brother, held captive by the Christians. This image has been taken directly from the priceless emerald, belonging to the Vatican Treasury.

This photo is not in the same category as so-called "extras" in psychic photos which tend to show spirit beings, usually with some kind of relationship to photographed persons. Instead it has the characteristics of a time warp. A definition of time warp from the Free Online Dictionary is: "A hypothetical discontinuity or distortion occurring in the flow of *time* that would move events from one *time* period to another or suspend the passage of *time*."

There are many eyewitness accounts available of time warps. To understand how this may function you can compare the passing of time with a movie reel. When you have watched a movie the content has not disappeared forever, it still exists on the reel, and you can watch a specific scene again if you know where to look, or just cut out a single frame. This is then like a photo frozen in time, a time warp.

In the same way whatever happens on our planet is recorded as on film in an additional time dimension. In Hinduism and New Age publications this is generally called the akashic record. Wikipedia offers this definition: "The akashic records (akasha is a Sanskrit word meaning "sky", "space" or "aether") is a term used in theosophy (and Anthroposophy) to describe a compendium of mystical knowledge encoded in a non-physical plane of existence." Also: "The akashic record is like an immense photographic film, registering all the desires and earth experiences of our planet."

The scenes that people have described in time warp experiences tend to be highly charged with psychic energy, such as battle scenes or events in the Bermuda triangle. For my understanding of the nature of this additional time dimension see [The Science of Spirituality](#).
